

DEVICE 365

Total Protection for your Data,
Devices & Digital Life

Your Data Deserves more than Hope.

It Deserves Protection.

In today's digital world, data loss isn't just a possibility—it's a threat waiting to happen.

Whether you're working remotely, on the go, or in the office, your files need more than just a backup.

They need Device 365.

Device 365 offers cloud-based backup and recovery that's fast, secure, and effortless—designed for businesses, remote teams and individuals who can't afford to lose their digital assets.

Local backups are also included when you backup to the cloud as an added DR measure.

SECURE, ENCRYPTED with ZERO TRUST DATA SECURITY

Key Features

Automatic Cloud Backup

Your important Devices are backed up automatically in real-time, so you're always protected.

Protect Unlimited Devices

Backup Servers, PCs, Laptops, VMware, Hyper-V, Databases, Synology, QNAP and Network Locations in mins via a simple interface. Windows, Mac, Linux are all supported.

Easy Restore Anytime

Lost a file or had a system crash? Restore from any version with just a few clicks.

Centralized Management Portal

Gain full visibility over all protected devices, backup statuses and storage usage from our user-friendly web portal.

Versioning & Continuous Backup

Choose how many versions you want to keep with continuous protection against accidental deletion or ransomware attacks.

Security and Compliance

Military-Grade Encryption

All files are encrypted in flight and at rest using AES 256-bit encryption, ensuring top-tier security and compliance.

Secure Data Centres

Choose where your data resides. Either store in our DC's or your own S3 Storage in the cloud and create local backup sets to keep data onsite on the customers on-premise storage.

Flexible Scheduling

Decide when you want the backups to run, daily, weekly or monthly. Have full control of what you want to backup and when.

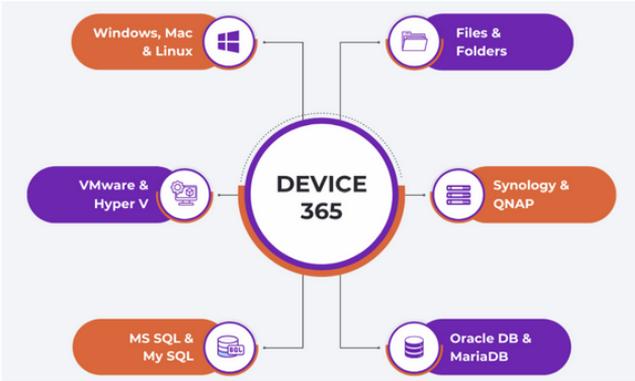

Encryption and Password

Every account has an account password and every backup set has their own encryption password. You have full control to decide the passwords of your choice, however if these are lost then you can not restore the data. There is no 3rd party access to your data.

Global Security Standards

We meet all the major protocols including ISO 27001, GDPR, PCI, HIPAA, CJIS, SEC, SEA, FEPPRA and others.
